| 3.5. Installing the NVIDIA vGPU Software Graphics Driver                          |
| 3.6. Licensing an NVIDIA vGPU 30  |

# ABOUT THIS GUIDE

*Virtual GPU Software Quick Start Guide* provides minimal instructions for installing and configuring NVIDIA<sup>®</sup> virtual GPU software on the Citrix Hypervisor or VMware vSphere hypervisor and for installing and configuring a single-instance NVIDIA virtual GPU License Server on Windows. If you need complete instructions, are using other platforms, or require high availability for the license server, refer to *Virtual GPU Software User Guide* and *Virtual GPU License Server User Guide*.

## Chapter 1. GETTING YOUR NVIDIA VGPU SOFTWARE

After your order for NVIDIA vGPU software is processed, you will receive an order confirmation message from NVIDIA. This message contains information that you need for getting your NVIDIA vGPU software from the NVIDIA Licensing Portal. To log in to the NVIDIA Licensing Portal, you must have an NVIDIA Enterprise Account.

## 1.1. Before You Begin

Before following the procedures in this guide, ensure that the following prerequisites are met:

- You have a server platform that is capable of hosting your chosen hypervisor and NVIDIA GPUs that support NVIDIA vGPU software. For a list of validated server platforms, refer to NVIDIA GRID Certified Servers.
- One or more NVIDIA GPUs that support NVIDIA vGPU software is installed in your server platform.
- A supported virtualization software stack is installed according to the instructions in the software vendor's documentation.
- A virtual machine (VM) running a supported Windows guest operating system (OS) is configured in your chosen hypervisor.

For information about supported hardware and software, and any known issues for this release of NVIDIA vGPU software software, refer to the *Release Notes* for your chosen hypervisor:

- Virtual GPU Software for Citrix Hypervisor Release Notes
- ► Virtual GPU Software for VMware vSphere Release Notes

## 1.2. Your Order Confirmation Message

After your order for NVIDIA vGPU software is processed, you will receive an order confirmation message to which your NVIDIA Entitlement Certificate is attached.

| entitlement-pdf v<br>PDF 13 KB | PDF | entitlementpdf<br>13 KB | ~ |
|--------------------------------|-----|-------------------------|---|
|--------------------------------|-----|-------------------------|---|

Thank you for your software and/or services order!

Please find enclosed your Entitlement Certificate for the Software and/or Services products you ordered.

Please refer to the attached Entitlement Certificate to register for your software and services.

The following is your order information:

| PO Number | NVIDIA Sales Order | NVIDIA Delivery Number |
|-----------|--------------------|------------------------|
|           |                    |                        |

#### **Questions?**

NVIDIA Enterprise Support contact information can be found here https://www.NVIDIA.com/en-us/support/enterprise/

Your NVIDIA Entitlement Certificate contains your product activation keys.

#### NVIDIA® Entitlement Certificate This certificate serves as evidence that NVIDIA has entitled you for the following product(s).

| End Customer ( | <b>NVIDIA Delivery</b>    |             |
|----------------|---------------------------|-------------|
|                | Entitlement Date          | 11 APR 2019 |
|                | PO Number                 |             |
|                | <b>NVIDIA Sales Order</b> |             |

| No | Entitlement Description                | Quantity | Sales Type | Term   | Start Date  | End Date    |
|----|--|----------|------------|--------|-------------|-------------|
| 1  | Quadro vDWS Bundle - Subscription, CCU |          |            |        |             |             |
|    | Quadro vDWS Subscription, CCU          | 48 EA    | Initial    | 1 Year | 11 APR 2019 | 10 APR 2020 |
|    | GRID vApps Subscription, CCU           | 48 EA    | Initial    | 1 Year | 11 APR 2019 | 10 APR 2020 |
|    | PAK ID 051Mene17jcNbt44WVFWz0-10       |          |            |        |             |             |

Please follow the instructions provided in the following section to register your entitlements.

Thank you for your order!

Your NVIDIA Entitlement Certificate also provides instructions for using the certificate.

#### NOTICE

#### HOW TO USE THIS CERTIFICATE

#### **Registration Instructions**

Please refer to the <u>NVIDIA Virtual GPU Software Quick Start Guide</u> for information on how to get started, including instructions on how to register for your entitlement.

#### Sales Type: Initial

- 1. Already have vGPU entitlements? Please Login
- 2. New to vGPU entitlements? Please register and follow instructions on the registration page.

Questions? NVIDIA Enterprise Support contact information can be found <u>here</u>

Rights and restrictions on the use, transfer and copying of the Software are set forth in NVIDIA's End User License Agreement.

To redeem the product activation keys for your NVIDIA vGPU software, you must have an NVIDIA Enterprise Account.

For a Support, Upgrade, and Maintenance Subscription (SUMS) renewal, no action is required. You do not need to redeem the product activation keys for a SUMS renewal.

- If you do not have an account, follow the Register link in the instructions for using the certificate to create your account. For details, see Creating your NVIDIA Enterprise Account.
- If you already have an account, follow the Login link in the instructions for using the certificate to log in to the NVIDIA Enterprise Application Hub, go to the NVIDIA Licensing Portal, and redeem your product activation keys. For details, see Downloading your NVIDIA vGPU Software.

## 1.3. Creating your NVIDIA Enterprise Account

If you do not have an NVIDIA Enterprise Account, you must create an account to be able to log in to the NVIDIA Licensing Portal.

Before you begin, ensure that you have your order confirmation message.

1. In the instructions for using your NVIDIA Entitlement Certificate, follow the **Register** link.

2. Fill out the form on the **NVIDIA Enterprise Account Registration** page and click **Register**.

| NVIDIA Enterprise Account Registrat   | ion ·  |

| Street 2.   |  |
| City:   |  |
| Postal Code/Zip Code:   |  |
| * Phone:  |  |
|   |  |

A message confirming that an account has been created appears and an e-mail instructing you to set your NVIDIA password is sent to the e-mail address you provided.

3. Open the e-mail instructing you to set your password and click **SET PASSWORD**.

| Dear  |
|---|
| Thank you for your business and welcome to NVIDIA.  |
| Login   |
| To get started, please select the link below to set up<br>your password:                              |
| SET PASSWORD  |
| Once you have reset your password, please allow 24 business hours before attempting to <u>LOGIN</u> . |
| Questions? Please contact us at <u>NVIDIA Enterprise</u><br><u>Support</u> .                          |
| Thank you for your interest in NVIDIA products.   |
| Best Regards,<br>NVIDIA Team  |

After you have set your password during the initial registration process, you will be able to log in to your account within 15 minutes. However, it may take up to 24 business hours for your entitlement to appear in your account.

For your account security, the **SET PASSWORD** link in this e-mail is set to expire in 24 hours.

4. Enter and re-enter your new password, and click SUBMIT.

| SET NEW PASSWO | RD                                      |   |
|----------------|---|---|
|                |   |   |
|                | New password:                           |   |
|                |   |   |
|                | Re-type password:                       |   |
|                | Between 9 and 54 characters (inclusive) | SUBMIT  |
|                | ✓ At least one lowercase letter         |   |
|                | ✓ At least one uppercase letter         |   |
|                | ✓ At least one number                   |   |
|                | ✓ At least one special character()      |   |
|                | Password Match                          |   |
|                |   |   |
|                |   |   |
|                |   |   |
|                |   | Terms & Conditions   Legal Info   Privacy Policy<br>Copyright © 2019 NVIDIA Corporation |

A message confirming that your password has been set successfully appears.

| Password                        |   |
|---------------------------------|---|
|                                 |   |
| SUCCESS                         |   |
| Your password has been updated. |   |
|                                 |   |
|                                 |   |
|                                 |   |
|                                 |   |
|                                 |   |
|                                 | Terms & Conditions   Legal Info   Privacy Policy<br>Copyright © 2019 NVIDIA Corporation |

You are then automatically directed to log in to the NVIDIA Licensing Portal with your new password.

## 1.4. Downloading your NVIDIA vGPU Software

Before you begin, ensure that you have your order confirmation message and have created an NVIDIA Enterprise Account.

- 1. Visit the NVIDIA Enterprise Application Hub by following the Login link in the instructions for using your NVIDIA Entitlement Certificate or when prompted after setting the password for your NVIDIA Enterprise Account.
- 2. When prompted, provide your e-mail address and password, and click LOGIN.

| NVIDIA APPLICATION | I HUB LOGIN |                              |   |
|--------------------|-------------|------------------------------|---|
|                    |             |                              |   |
|                    | Username    |                              |   |
|                    |             |                              |   |
|                    | Password    |                              |   |
|                    |             | LOGIN                        |   |
|                    |             | Forgot password?   Need help | ?   |
|                    |             |                              |   |
|                    |             |                              |   |
|                    |             |                              |   |
|                    |             |                              |   |
|                    |             |                              | Terms and Conditions   Legal Info   Privacy Policy<br>Copyright © 2019 NVIDIA Corporation |

3. On the NVIDIA APPLICATION HUB page that opens, click NVIDIA LICENSING PORTAL.

The NVIDIA Licensing Portal dashboard page opens.

|  |     |  |  |  |  |

- **9.** In the **Download Complete** pop-up window, follow the links to download any additional software that you need for your NVIDIA vGPU software deployment.
  - a) Follow the link to the NVIDIA vGPU software license server software for your license server host machine's operating system, for example, **License Manager for Windows**.
  - b) If you are using an NVIDIA Tesla<sup>™</sup> M60 or M6 GPU and think you might need to change its mode, follow the **Mode Change Utility** link.

For details about when you need to change the mode, see Switching the Mode of a Tesla M60 or M6 GPU.

# Chapter 2. INSTALLING YOUR NVIDIA VGPU SOFTWARE LICENSE SERVER AND LICENSE FILES

The NVIDIA vGPU software License Server is used to serve a pool of floating licenses to NVIDIA vGPU software licensed products. The license server is designed to be installed at a location that is accessible from a customer's network, and be configured with licenses obtained from the NVIDIA Licensing Portal.

These instructions cover only the installation and configuration of a single-instance license server. If you require high availability for the license server, refer to *Virtual GPU License Server User Guide* for instrictions for how to configure a primary and secondary license server. If you do not register a secondary server when the primary server is registered, you **cannot** register the secondary server later.

## 2.1. Overview of NVIDIA vGPU software Licensing

NVIDIA vGPU software is a licensed product. Licensed vGPU functionalities are activated during guest OS boot by the acquisition of a software license served over the network from an NVIDIA vGPU software license server. The license is returned to the license server when the guest OS shuts down.

The licenses served by the NVIDIA vGPU software license server are obtained from the NVIDIA Licensing Portal as downloadable license files, and installed into the license server through its management interface.

## 2.2. Platform Configuration Requirements

- The platform must have a fixed (unchanging) IP address. The IP address may be assigned dynamically by DHCP or statically configured, but must be constant.
- The platform must have at least one unchanging Ethernet MAC address, to be used as a unique identifier when registering the server and generating licenses in the NVIDIA Licensing Portal.
- The platform's date and time must be set accurately. NTP is recommended.

## 2.3. Installing the Java Runtime Environment

If a suitable Java runtime environment (JRE) version is not already installed on your system, install a supported JRE before running the NVIDIA license server installer.

Install a JRE for the same the processor architecture as the license server that you will install: If you will install a 32-bit license server, install a 32-bit JRE; if you will install a 64-bit license server, install a 64-bit JRE.

- 1. Download a supported Oracle Java SE JRE or OpenJDK JRE.
  - Download Oracle Java SE JRE from the java.com: Java + You page.
  - Download OpenJDK JRE from the Community builds using source code from OpenJDK project on GitHub.
- 2. Install the JRE that you downloaded.

• Oracle Java SE JRE installation:

OpenJDK JRE installation:

3. Set the JAVA\_HOME system variable to the full path to the jre folder of your JRE installation.

For example:

- For 64-bit Oracle Java SE JRE: C:\Program Files\Java\jre1.8.0\_191
- For 32-bit Oracle Java SE JRE: C:\Program Files (x86)\Java \jre1.8.0\_191
- For 64-bit OpenJDK JRE: C:\Program Files\ojdkbuild\java-1.8.0openjdk-1.8.0.201-1\jre

For 32-bit OpenJDK JRE: C:\Program Files (x86)\ojdkbuild \java-1.8.0-openjdk-1.8.0.201-1\jre

Ensure that the path does **not** include any trailing characters, such as a slash or a space.

If you are upgrading to a new version of the JRE, update the value of the JAVA\_HOME system variable to the full path to the jre folder of your **new** JRE version.

4. Ensure that the Path system variable contains the path to the java.exe executable file.

The installer may have already added this path for you.

For example:

- For 64-bit Oracle Java SE JRE: C:\Program Files\Java \jre1.8.0\_191\bin
- For 32-bit Oracle Java SE JRE: C:\Program Files (x86)\Java \jre1.8.0\_191\bin
- For 64-bit OpenJDK JRE: C:\Program Files\ojdkbuild\java-1.8.0openjdk-1.8.0.201-1\bin
- For 32-bit OpenJDK JRE: C:\Program Files (x86)\ojdkbuild \java-1.8.0-openjdk-1.8.0.201-1\bin

## 2.4. Installing the License Server Software

- 1. Unzip the license server installer and run setup.exe.
- **2.** Accept the EULA for the license server software and the Apache Tomcat software used to support the license server's management interface.

**3.** Choose the destination folder where you want the license server software to be installed.

| NVIDIA License Server  | – 🗆 X  |
|--|--|
|  | Choose Install Folder  |
| <ul> <li>Introduction</li> <li>License Agreement</li> <li>Apache License</li> <li>Choose Install Folder</li> <li>Choose Firewall Options</li> <li>Pre-Installation Summary</li> <li>Repair Installation</li> <li>Installing</li> <li>Install Complete</li> </ul> | Please choose a destination folder for this installation.         Destination folder:         C:\Program Files (x86)\WVIDIA\License Server         Restore Default Folder       Choose |
| InstallAnywhere  | Previous Next  |

4. In the **Choose Firewall Options** dialog box, select the ports to be opened in the firewall.

To enable remote clients to access licenses from the server and prevent remote access to the management interface, use the default setting, which sets ports as follows:

- Port 7070 is open to enable remote clients to access licenses from the server.
- Port 8080 is closed to ensure that the management interface is available only through a web browser running locally on the license server host.

5. After installation has completed successfully, click **Done** to exit the installer.

## 2.5. Obtaining the License Server's MAC Address

The license server's Ethernet MAC address uniquely identifies your server to the NVIDIA Licensing Portal. You will need this address to register your license server with the NVIDIA Licensing Portal to generate license files.

- 1. Open a web browser on the license server host and connect to the URL http://localhost:8080/licserver.
- 2. In the license server management interface, select **Configuration**.
- **3.** On the License Server Configuration page that opens, in the Server host ID dropdown list, select the platform's ETHERNET address.

| Attp://localhost:8080/licserv                                     | ver/serverProperties_view.actio | on $ ho$                | <br>ŵ  |

# 2.6. Managing your License Servers and Getting your License Files

To be able to download NVIDIA vGPU software licenses, you must create at least one license server on the NVIDIA Licensing Portal and allocate licenses to the server. After creating a license server and allocating licenses to it, you can download your license file.

# 2.6.1. Creating a License Server on the NVIDIA Licensing Portal

To be able to download NVIDIA vGPU software licenses, you must create at least one license server on the NVIDIA Licensing Portal. Creating a license server on the NVIDIA Licensing Portal registers your license server host with the NVIDIA Licensing Portal through the MAC address of the host.

 If you are not already logged in, log in to the NVIDIA Enterprise Application Hub and click NVIDIA LICENSING PORTAL to go to the NVIDIA Licensing Portal. If no license servers have been created for your account, the NVIDIA Licensing Portal dashboard displays a message asking if you want to create a license server.

| Secondary MAC Address (optional) |   |          |   |   |
|                                  |   |          |   |   |

- 3. Provide the details of your license server.
  - a) In the Server Name field, enter the host name of the license server.
  - b) Optional: In the **Description** field, enter a text description of the license server. This description will be displayed on the details page for the license server that you are creating.
  - c) In the MAC Address field, enter the MAC address of your license server.
- 4. Add the licenses that you want to allocate to this license server.
  - a) From the **Product** drop-down list, select the product for which you want to add licenses.
  - b) In the **Licenses** field, enter the number of licenses for the product that you want to add.
  - c) To add licenses for an additional product, click the plus (+) icon next to the **Licenses** field and use the **Product** and **Licenses** fields that are added to the window to select the product and enter the number of licenses.

- 5. Leave the Secondary License Server and Secondary MAC Address fields unset.
- 6. Click Create.

#### 2.6.2. Downloading a License File

Each license server that you create has license file associated with it. The license file contains all the licenses that you allocated to the license server. After downloading the license file, you can install it on the license server host associated with the license server on the NVIDIA Licensing Portal.

- 1. If you are not already logged in, log in to the NVIDIA Enterprise Application Hub and click **NVIDIA LICENSING PORTAL** to go to the NVIDIA Licensing Portal.
- **2.** In the list of license servers on the NVIDIA Licensing Portal dashboard, select the license server whose associated license file you want to download.
- **3.** In the details page for the license server that opens, review the licenses allocated to the license server.

4. Click **DOWNLOAD LICENSE FILE** and save the .bin license file to your license server for installation.

## 2.7. Installing a License

NVIDIA vGPU software licenses are distributed as .bin files for download from the NVIDIA Licensing Portal.

Before installing a license, ensure that you have downloaded the license file from the NVIDIA Licensing Portal.

- 1. In the license server management interface, select License Management.
- 2. On the License Management page that opens, click Choose File.

# Chapter 3. INSTALLING AND CONFIGURING NVIDIA VGPU MANAGER AND THE GUEST DRIVER

Before installing and configuring NVIDIA vGPU Manager and the Guest Driver, ensure that a VM running a supported Windows guest OS is configured in your chosen hypervisor.

The factory settings of some supported GPU boards are incompatible with NVIDIA vGPU software. Before configuring NVIDIA vGPU software on these GPU boards, you must configure the boards to change these settings.

## 3.1. Switching the Mode of a Tesla M60 or M6 GPU

Tesla M60 and M6 GPUs support compute mode and graphics mode. NVIDIA vGPU requires GPUs that support both modes to operate in graphics mode.

Only Tesla M60 and M6 GPUs require and support mode switching. Other GPUs that support NVIDIA vGPU do not require or support mode switching.

Even in compute mode, Tesla M60 and M6 GPUs do **not** support NVIDIA vComputeServer vGPU types.

Recent Tesla M60 GPUs and M6 GPUs are supplied in graphics mode. However, your GPU might be in compute mode if it is an older Tesla M60 GPU or M6 GPU, or if its mode has previously been changed.

If your GPU supports both modes but is in compute mode, you must use the gpumodeswitch tool to change the mode of the GPU to graphics mode. If you are unsure which mode your GPU is in, use the gpumodeswitch tool to find out the mode.

For more information, see *gpumodeswitch User Guide*.

## 3.2. Installing the NVIDIA Virtual GPU Manager

Before guests enabled for NVIDIA vGPU can be configured, the NVIDIA Virtual GPU Manager must be installed in your chosen hypervisor. The process for installing the NVIDIA Virtual GPU Manager depends on the hypervisor that you are using.

If you need more detailed instructions, refer to the appropriate NVIDIA vGPU installation guide.

# 3.2.1. Installing the NVIDIA Virtual GPU Manager on VMware vSphere

The NVIDIA Virtual GPU Manager for VMware vSphere ESXi is distributed as a vSphere Installation Bundle (VIB) file.

- 1. Copy the NVIDIA Virtual GPU Manager VIB file to the ESXi host.
- 2. Put the ESXi host into maintenance mode.

```
$ esxcli system maintenanceMode set --enable true
```

**3.** Run the esxcli command to install the NVIDIA Virtual GPU Manager from the VIB file.

```
$ esxcli software vib install -v directory/NVIDIA**.vib
```

*directory* is the path to the directory that contains the VIB file.

4. Exit maintenance mode.

```
\$ esxcli system maintenanceMode set --enable false
```

5. Reboot the ESXi host.

#### \$ reboot

6. Verify that the NVIDIA kernel driver can successfully communicate with the physical GPUs in your system by running the nvidia-smi command without any options.

```
$ nvidia-smi
```

If successful, the nvidia-smi command lists all the GPUs in your system.

# 3.2.2. Installing the NVIDIA Virtual GPU Manager on Citrix Hypervisor

The NVIDIA Virtual GPU Manager for Citrix Hypervisor is distributed as an RPM Package Manager (RPM) file. It runs in the Citrix Hypervisor Control Domain (dom0) shell.

**1.** Copy the NVIDIA Virtual GPU Manager RPM file to the Citrix Hypervisor dom0 shell.

2. Run the rpm command to install the package.

[root@xenserver ~] # rpm -iv NVIDIA-\*\*.rpm

3. Reboot the Citrix Hypervisor platform.

[root@xenserver ~] # shutdown -r now

4. After the Citrix Hypervisor host has rebooted, verify the installation of the NVIDIA Virtual GPU Manager package for Citrix Hypervisor by checking for the NVIDIA kernel driver in the list of kernel-loaded modules.

```
[root@xenserver ~]# lsmod |grep nvidia
nvidia 8152994 0
i2c_core 20294 2 nvidia,i2c_
```

## 3.3. Disabling and Enabling ECC Memory

Some GPUs that support NVIDIA vGPU software support error correcting code (ECC) memory with NVIDIA vGPU. ECC memory improves data integrity by detecting and handling double-bit errors. However, not all GPUs, vGPU types, and hypervisor software versions support ECC memory with NVIDIA vGPU.

On GPUs that support ECC memory with NVIDIA vGPU, ECC memory is supported with C-series and Q-series vGPUs, but not with A-series and B-series vGPUs. Although A-series and B-series vGPUs start on physical GPUs on which ECC memory is enabled, enabling ECC with vGPUs that do not support it might incur some costs.

On physical GPUs that do not have HBM2 memory, the amount of frame buffer that is usable by vGPUs is reduced. All types of vGPU are affected, not just vGPUs that support ECC memory.

The effects of enabling ECC memory on a physical GPU are as follows:

- ECC memory is exposed as a feature on all supported vGPUs on the physical GPU.
- In VMs that support ECC memory, ECC memory is enabled, with the option to disable ECC in the VM.
- ECC memory can be enabled or disabled for individual VMs. Enabling or disabling ECC memory in a VM does not affect the amount of frame buffer that is usable by vGPUs.

GPUs based on the Pascal GPU architecture and later GPU architectures support ECC memory with NVIDIA vGPU. These GPUs are supplied with ECC memory enabled.

Tesla M60 and M6 GPUs support ECC memory when used without GPU virtualization, but NVIDIA vGPU does not support ECC memory with these GPUs. In graphics mode, these GPUs are supplied with ECC memory disabled by default.

Some hypervisor software versions do not support ECC memory with NVIDIA vGPU.

If you are using a hypervisor software version or GPU that does not support ECC memory with NVIDIA vGPU and ECC memory is enabled, NVIDIA vGPU fails to start. In this situation, you must ensure that ECC memory is disabled on all GPUs if you are using NVIDIA vGPU.

### 3.3.1. Disabling ECC Memory

If ECC memory is unsuitable for your workloads but is enabled on your GPUs, disable it. You must also ensure that ECC memory is disabled on all GPUs if you are using NVIDIA vGPU with a hypervisor software version or a GPU that does not support ECC memory with NVIDIA vGPU. If your hypervisor software version or GPU does not support ECC memory and ECC memory is enabled, NVIDIA vGPU fails to start.

Where to perform this task from depends on whether you are changing ECC memory settings for a physical GPU or a vGPU.

- For a physical GPU, perform this task from the hypervisor host.
- For a vGPU, perform this task from the VM to which the vGPU is assigned.

ECC memory must be enabled on the physical GPU on which the vGPUs reside.

Before you begin, ensure that NVIDIA Virtual GPU Manager is installed on your hypervisor. If you are changing ECC memory settings for a vGPU, also ensure that the NVIDIA vGPU software graphics driver is installed in the VM to which the vGPU is assigned.

1. Use nvidia-smi to list the status of all physical GPUs or vGPUs, and check for ECC noted as enabled.

```
# nvidia-smi -q
-----NVSMI LOG-------
Timestamp : Mon Dec 23 18:36:45 2019
Driver Version : 440.38
Attached GPUs : 1
GPU 0000:02:00.0
[...]
Ecc Mode
Current : Enabled
Current : Enabled
```

[...]

- 2. Change the ECC status to off for each GPU for which ECC is enabled.
  - If you want to change the ECC status to off for all GPUs on your host machine or vGPUs assigned to the VM, run this command:

# nvidia-smi -e 0

If you want to change the ECC status to off for a specific GPU or vGPU, run this command:

```
# nvidia-smi -i id -e 0
```

*id* is the index of the GPU or vGPU as reported by nvidia-smi.

This example disables ECC for the GPU with index 0000:02:00.0.

# nvidia-smi -i 0000:02:00.0 -e 0

- **3.** Reboot the host or restart the VM.
- 4. Confirm that ECC is now disabled for the GPU or vGPU.

[...]

#### 3.3.2. Enabling ECC Memory

If ECC memory is suitable for your workloads and is supported by your hypervisor software and GPUs, but is disabled on your GPUs or vGPUs, enable it.

Where to perform this task from depends on whether you are changing ECC memory settings for a physical GPU or a vGPU.

- For a physical GPU, perform this task from the hypervisor host.
- For a vGPU, perform this task from the VM to which the vGPU is assigned.

ECC memory must be enabled on the physical GPU on which the vGPUs reside.

Before you begin, ensure that NVIDIA Virtual GPU Manager is installed on your hypervisor. If you are changing ECC memory settings for a vGPU, also ensure that the NVIDIA vGPU software graphics driver is installed in the VM to which the vGPU is assigned.

1. Use nvidia-smi to list the status of all physical GPUs or vGPUs, and check for ECC noted as disabled.

| Ecc | Mode    |   |          |
|-----|---------|---|----------|
|     | Current | : | Disabled |
|     | Pending | : | Disabled |

- [...]
- 2. Change the ECC status to on for each GPU or vGPU for which ECC is enabled.
  - If you want to change the ECC status to on for all GPUs on your host machine or vGPUs assigned to the VM, run this command:

```
# nvidia-smi -e 1
```

If you want to change the ECC status to on for a specific GPU or vGPU, run this command:

```
# nvidia-smi -i id -e 1
```

*id* is the index of the GPU or vGPU as reported by nvidia-smi.

This example enables ECC for the GPU with index 0000:02:00.0.

# nvidia-smi -i 0000:02:00.0 -e 1

- **3.** Reboot the host or restart the VM.
- 4. Confirm that ECC is now enabled for the GPU or vGPU.

```
# nvidia-smi -q
===========NVSMI LOG============
Timestamp

## 3.4. Attaching an NVIDIA vGPU Profile to a VM

To attach an NVIDIA vGPU profile to a virtual machine (VM), you must configure the VM hardware. The process for attaching an NVIDIA vGPU profile to a VM depends on the hypervisor that you are using.

### 3.4.1. Configuring a vSphere VM with NVIDIA vGPU

**Caution** Output from the VM console in the VMware vSphere Web Client is not available for VMs that are running vGPU. Make sure that you have installed an alternate means of accessing the VM (such as VMware Horizon or a VNC server) before you configure vGPU.

VM console in vSphere Web Client will become active again once the vGPU parameters are removed from the VM's configuration.

- **1.** Open the vCenter Web UI.
- 2. In the vCenter Web UI, right-click the VM and choose Edit Settings.
- 3. Click the Virtual Hardware tab.
- In the New device list, select Shared PCI Device and click Add.
   The PCI device field should be auto-populated with NVIDIA GRID vGPU.

| 🔁 Win7x86 - Edit Settin     | gs         |                    |       |            |   |                      | (?) ₩ |

| Compatibility: ESXi 6.0 and | d later (V | 'M version 11)     |       |            |   | ОК Са                | ncel  |

- **5.** From the **GPU Profile** drop-down menu, choose the type of vGPU you want to configure and click **OK**.
- 6. Ensure that VMs running vGPU have all their memory reserved:
  - a) Select Edit virtual machine settings from the vCenter Web UI.

b) Expand the Memory section and click Reserve all guest memory (All locked).

After you have configured a vSphere VM with a vGPU, start the VM. VM console in vSphere Web Client is not supported in this vGPU release. Therefore, use VMware Horizon or VNC to access the VM's desktop.

# 3.4.2. Configuring a Citrix Hypervisor VM with Virtual GPU

- **1.** Ensure the VM is powered off.
- 2. Right-click the VM in XenCenter, select **Properties** to open the VM's properties, and select the **GPU** property.

The available GPU types are listed in the GPU type drop-down list:

After you have configured a Citrix Hypervisor VM with a vGPU, start the VM, either from XenCenter or by using xe vm-start in a dom0 shell. You can view the VM's console in XenCenter.

# 3.5. Installing the NVIDIA vGPU Software Graphics Driver

After you create a Windows VM on the hypervisor and boot the VM, the VM should boot to a standard Windows desktop in VGA mode at 800×600 resolution. You can use the Windows screen resolution control panel to increase the resolution to other standard resolutions, but to fully enable GPU operation, the NVIDIA vGPU software graphics driver must be installed.

- 1. Copy the NVIDIA Windows driver package to the guest VM where you are installing the driver.
- 2. Execute the package to unpack and run the driver installer.

- 3. Click through the license agreement.
- 4. Select **Express Installation** and click **NEXT**. After the driver installation is complete, the installer may prompt you to restart the platform.
- **5.** If prompted to restart the platform, do one of the following:
  - Select **Restart Now** to reboot the VM.
  - Exit the installer and reboot the VM when you are ready.

After the VM restarts, it boots to a Windows desktop.

- **6.** Verify that the NVIDIA driver is running.
  - a) Right-click on the desktop.
  - b) From the menu that opens, choose NVIDIA Control Panel.
  - c) In the NVIDIA Control Panel, from the Help menu, choose System Information.

**NVIDIA Control Panel** reports the vGPU that is being used, its capabilities, and the NVIDIA driver version that is loaded.

## 3.6. Licensing an NVIDIA vGPU

Perform this task from the guest VM to which the vGPU is assigned.

The **NVIDIA Control Panel** tool that you use to perform this task detects that a vGPU is assigned to the VM and, therefore, provides no options for selecting the license type. After you license the vGPU, NVIDIA vGPU software automatically selects the correct type of license based on the vGPU type.

These instructions cover only licensing for a single-instance license server. If you configured a primary and secondary license server, refer to *Virtual GPU Client Licensing User Guide* for instructions for how to specify the address and port number of the primary and secondary license servers.

- 1. Open NVIDIA Control Panel:
  - Right-click on the Windows desktop and select NVIDIA Control Panel from the menu.
  - Open Windows Control Panel and double-click the NVIDIA Control Panel icon.
- 2. In NVIDIA Control Panel, select the Manage License task in the Licensing section of the navigation pane.

If the Licensing section and Manage License task are not displayed in NVIDIA Control Panel, the system has been configured to hide licensing controls in NVIDIA Control Panel. For information about registry settings, see Virtual GPU Client Licensing User Guide.

The Manage License task pane shows that NVIDIA vGPU is currently unlicensed.

| NVIDIA Control Panel                                  |   |          |
|---|---|----------|

|   | Your system does not have a valid GRID vGPU license.                  |          |
| Manage License  | To access GRID vGPU features, enter license server details and apply. |          |
|   | Primary Licence Server*   |          |
| Adjust video image settings                           |   |          |
|   | Port Number:  |          |
|   |   | =        |
|   |   |          |
|   | Secondary License Server:   |          |
|   |   |          |
|   | Port Number:  |          |
|   |   |          |
|   |   |          |
|   | Description:  |          |
|   |   |          |
|   | Typical usage scenarios:  |          |
|   | · / Press and a second second   |          |
|   |   |          |
|   |   |          |
| System Information                                    | 4   | •<br>•   |

**3.** In the **Primary License Server** field, enter the address of your NVIDIA vGPU software License Server.

The address can be a fully-qualified domain name such as gridlicensel.example.com, or an IP address such as 10.31.20.45.

- 4. Leave the **Port Number** field under the **Primary License Server** field unset. The port defaults to 7070, which is the default port number used by NVIDIA vGPU software License Server.
- 5. Leave the Secondary License Server field and the Port Number field under it unset.
- 6. Click **Apply** to assign the settings. The system requests the appropriate license for the current vGPU from the configured license server.

The vGPU within the VM should now exhibit full frame rate, resolution, and display output capabilities. The VM is now capable of running the full range of DirectX and OpenGL graphics applications.

You have now completed the process of installing NVIDIA vGPU software and setting up a single VM to use NVIDIA vGPU.

If the system fails to obtain a license, see *Virtual GPU Client Licensing User Guide* for guidance on troubleshooting.
